

Blast Rooms

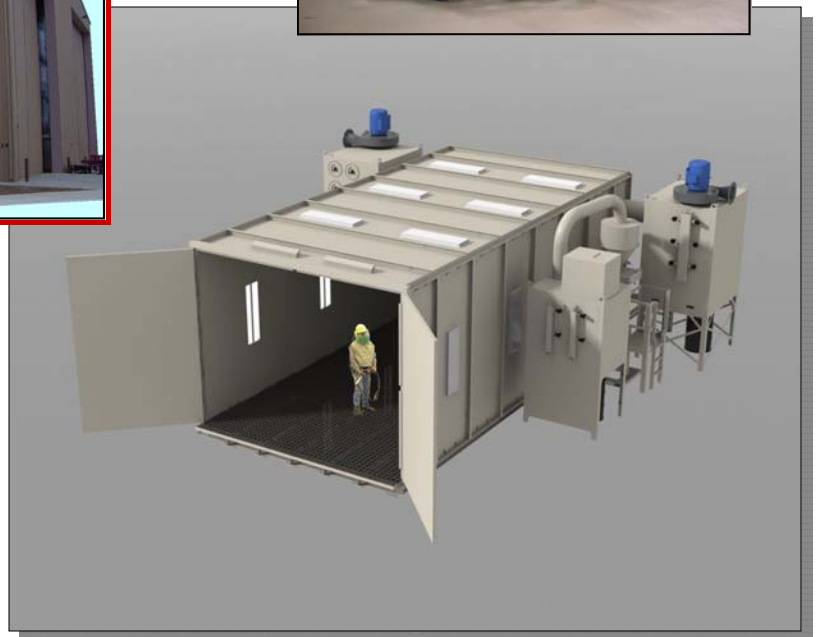

IPS....

Innovative Peening Systems

Innovative Peening Systems manufactures high end quality custom blast rooms using standard and proven blast machine components and dust collectors. The rooms are constructed out of durable 10

gauge steel walls and ceilings with 1.5 inch thick floor grating . Units are designed with full width work doors on one end or a thru style with doors on both ends. Cross draft or down draft air flow models available. Additional operator media delivery systems are available with complete operator safety and breathing equipment. Size of rooms are customized for the individual customer's application.
